This book is a comprehensive reference on ISO management system standards and their implementation. The impacts that ISO 9001 and ISO 14001 have had on business performance are analyzed in depth, and up-to-date perspectives are offered on the integration of these and other management standards (e.g. SA8000, ISO/TS 16949). Detailed information is provided on the signaling value of different management standards and on the new ISO standards for management systems, such as ISO 50001 and ISO 45001, relating to energy management and occupational health and safety. The role of audits in ensuring compliance with the standards and achievement of objectives is also carefully considered. The volume examines avenues for further research and emerging challenges. In offering an integrated, holistic perspective on ISO management system standards, this book will have wide appeal for academics, public decision-makers, and practitioners in the field of quality and environmental management.

The changes following more than two decades of economic reforms and globalization of the Indian economy – at state, corporate sector, and consumer level – raise interesting questions on the ways in which the stakeholders will continue to engage on the world stage, politically, socially and economically. One key feature of global trade over this period has been the growing importance of not only product standards

but, importantly, labor, environmental, food safety and social standards. Being essentially a non-tariff barrier, standards have often become critical to market access and essential to sustained competitiveness. This has a clear impact on the manner in which both global and Indian business is conducted now and in the future. It also underlines the need for a new area of enquiry that addresses the following questions: How are the Indian public and private actors – the state, domestic firms, local consumers and society – influencing and being influenced by such standards? Do standards really matter in an overwhelmingly informal production sphere, with consumers deeply segmented on the basis of a highly skewed distribution of income and with the rural population becoming further marginalized? We have limited knowledge about the challenges faced and strategies pursued by these key domestic actors, both public and private. How have they been able to drive these processes and what are their implications for larger concerns with inequalities and the conditions of the poor? How does the omnipresent informality influence compliance, encourage multiple standards and affect the chances of addressing institutional dysfunctionality? What role does regulation play? These are some of the issues dealt with in the book, which has chapters focusing on aspects of specific sectors such as microfinance, pharmaceuticals, automobiles, tea trading, the role of the state and changing consumer influence.
