~~Human Development - Diane E. Papalia, Sally Wendkos Olds ...~~

~~A best way to learn human life span. From the early life all the way to the end. Papalia, Olds & Feldman (2003) inform us about physical, cognitive and psychosocial determinants contributed in human development!~~

Designed for the mainstream human development course, this chronologically organized text combines research and applications with real-life examples to help students apply the material to realistic situations. Thorough coverage of cross-cultural topics and issues facing the disabled, in addition to exceptionally good coverage of health issues and applications, has helped to make Human Development stand apart from the competition. The ninth edition, like its predecessors, is both academically rigorous and very student friendly. The authors' clear, accessible writing style guides students through the various topics of human development with the help of a strong pedagogical program.

Designed for the mainstream human development course, this chronologically organized text combines research and applications with real-life examples to help students apply the material to realistic situations. Thorough coverage of cross-cultural topics and issues facing the disabled, in addition to exceptionally good coverage of health issues and applications, has helped to make Human Development stand apart from the competition. The ninth edition, like its predecessors, is both academically rigorous and very student friendly. The authors' clear, accessible writing style guides students through the various topics of human development with the help of a strong pedagogical program.

Life: The Essentials of Human Development is a brief account of human development that illustrates how psychological concepts apply to everyday life, while exposing students to the role that culture and diversity play throughout the lifespan.

The 11th edition of this classic best-seller retains the extensive and integrated cross-cultural and multicultural coverage, the proven Guidepost-Checkpoint learning system, and the balance between research and real-life applications that have made this text a long time favorite of students and faculty. In the warmly-written and engaging style that is their hallmark, Papalia, Olds, and Feldman once again paint an engaging chronological portrayal of development through the lifespan. This new edition features enhanced treatment of brain development and evolutionary psychology research as well as new Research in Action features highlighting interesting and timely topics.

Balanced coverage of the entire life span is just one thing that distinguishes HUMAN DEVELOPMENT: A LIFE-SPAN VIEW, Seventh Edition. With its comprehensive, succinct, and applied coverage, the text has proven its ability to capture students' interest while introducing them to the issues, forces, and outcomes that make us who we are. Robert V. Kail's expertise in childhood and adolescence, combined with John C. Cavanaugh's extensive research in gerontology, result in a book with a rich description of all life-span stages and important topics. A modified chronological approach traces development in sequential order from conception through late life, while also dedicating several chapters to key topical issues. This organization also allows the book to be relatively briefer than other texts, a benefit given the enormous amount of information covered in the course. The authors provide theoretical and empirical foundations that enable students to become educated, critical interpreters of developmental information. A blend of basic and applied research, as well as coverage of controversial topics and emergent trends, demonstrates connections between the laboratory and life.
