If you learn how, and apply what you learn, you will achieve just as the title reads- guaranteed! Note: Regardless of how out of shape, overweight, old, young, or failed in previous attempts- if you know exactly what builds muscle, learn how to burn body fat, and how to maintain muscle mass from deterioration, you can achieve the results you desire in a fairly short time. Bodybuilding is difficult, but not complicated...IF YOU KNOW HOW. Chances are that you have been programmed with the wrong information for years, which lead to an overweight/out of shape physique. There is tons of information on bodybuilding. Why do only a selective few achieve the physique they desire? There are 3 reason why 9/10 people fail to build muscles. 1) Don't know how, or the information they apply is incorrect or incomplete which leads to zero results, frustrations and giving up all together. 2) Commitment. 3) Desire a muscular and cut physique but don't want to diet and exercise. To prove point #1, ask your self the question: "What happens inside the body to build muscles?" If you don't know-SUPER! Because you will learn exactly what builds muscles, and how to how to maintain muscle mass in this short, yet powerful book. Point #2 Commitment and consistency. In order to commit to a program for 10-12 full weeks, you must have a strong reason why. Ask yourself "why do I want to build more muscle than ever before, and maintain muscle mass permanently?" And your answer(s) will lead to commitment and persistence. And point #3 Without diet and exercise, it is impossible to achieve a muscular physique! NOTE: This program does not contain cutting out all carbohydrates, or eating a bunch of animal meat, or chugging down endless protein shakes that leads to dead end after dead end- none of this nonsense. The information in this book has been tested on myself, and

others whom achieved outstanding results without harming the body. However, this program is drastically different than what you may be used to.
