This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.

He’s making his own “Fudge Bucks” and has plans to buy the entire world. But life gets really crazy when Fudge and his older brother, Peter, run into their long-lost relatives, the Howie Hatchers. Now they have to deal with annoying twin cousins and a weird younger cousin, coincidentally named Farley Drexel Hatcher—just like Fudge! Their names aren’t the only similarity, and before long, mini-Fudge is causing just as much trouble as Fudge always has! “As a kid, Judy Blume was my favorite author, and Tales of a Fourth Grade Nothing was my favorite book.”—Jeff Kinney, author of the bestselling Wimpy Kid series Love Fudge, Peter, and Sheila?
