Symlog A System For The

SYMLOG is a "SYstem for the Multiple Level Observation of Groups". The system was initially developed through forty-five years of research in the Department of Psychology and Social Relations at Harvard University. One purpose for the in-depth studies was to better understand effective leadership, group dynamics, and superior team performance. The results of the investigation include a comprehensive theory of social interaction; a highly refined measurement system; and a set of precise tools ...

What is SYMLOG?

SYMLOG: A System for the Multiple Level Observation of Groups:

Authors: Robert Freed Bales, Stephen P. Cohen, Stephen A. Williamson: Edition: illustrated: Publisher: Free Press, 1979: Original from: the University of Michigan: Digitized: 23 Aug 2007: ISBN: 0029013003, 9780029013007: Length: 537 pages: Subjects

Overview of the SYMLOG System - ResearchGate

SYMLOG is a theory of social interaction with a highly refined system for measuring key components inherent in social interaction. The components consist of three major dimensions of social interaction derived from factor analytic studies. One purpose for the studies that resulted in the formulation of the SYMLOG system was to understand better effective leadership, group dynamics, and superior team performance.

iea - About SYMLOG

In computing, syslog /'sɪslog/ is a standard for message logging. It allows separation of the software that generates messages, the system that stores them, and the software that reports and analyzes them. Each message is labeled with a facility code, indicating the software type generating the message, and assigned a severity level. Computer system designers may use syslog for system management and security auditing as well as general informational, analysis, and debugging messages. A ...

Syslog - Wikipedia

His first coding system was Interactive Process Analysis (IPA) (which was used to classify group behaviour into that which was task-oriented and that which was relationship-oriented) (Bales 1950). The system was revised in 1970 in the SYMLOG system (Systematic Multiple Level Observation of Groups).
