In this haunting and frank account, Donna Ford, bestselling author of *The Step Child*, returns to the horrific abuse she suffered at the hands of her stepmother. As a tiny girl of five, and for six long years, Donna was physically, mentally and sexually abused. She was starved, beaten and 'loaned out' to neighbours who raped and molested her ... and throughout her father stood by and did nothing. When her stepmother finally left the family home, Donna dreamed of a normal childhood in which she would be taken care of by the man who had, up until this point, failed her. But it was not to be. By telling the whole story of her Edinburgh childhood, Donna tries to

understand why the man who should have loved her the most - her own father - was the one who deceived her the most, by continuing to allow men to abuse her. Instead of finding a future of love and happiness, Donna was once again thrust into a living nightmare of exploitation and betrayal by those who should have wrapped her up in their love. While this is a true story of appalling child abuse, it is also a tale of how exhilaration, tenderness and self-development can flourish despite childhood horrors. We take a journey with Donna to discover the woman she has become: a devoted mother of three and a talented artist and writer.

Here are the wise words of ten children who grew up in stepfamilies. They offer their stories and, most important of all, they tell us what worked and what didn't.

An honest and groundbreaking guide to understanding the complicated emotions that develop between stepmothers and children. When faced with often overwhelming challenges, what woman with stepchildren is unfamiliar with that “stepmonster” feeling? Half of all women in the United States will live with or marry a man with children. To guide women new to this role—and empower those who are struggling with it—Wednesday Martin draws upon her own experience as a stepmother. She's frank about the harrowing process of becoming a stepmother, she considers the myths and realities of being married to a man with children, and she counteracts the cultural notion that stepmothers are solely responsible for the problems that often develop. Along the way, she interviews other stepmothers and stepchildren and offers up fascinating insights from literature, anthropology, psychology, and evolutionary biology that explain the little-understood realities of this unique parent-child relationship and—in an unexpected

With *The Medicine Wheel for Stepparents*, I hope to give some understanding and relief to blended families. Stepfamilies have common threads of dysfunction. There are many issues that form these common threads. These issues occur between stepparent and stepchild and biological parent, biological child, and extended family in blended families. I have listed the issues and have offered affordable solutions that are within our grasp. These common threads reappear in every aspect of family life, including financial matters such as your child's Social Security checks, child-support checks, medical bills, and the parents will. These issues occur when the power structure changes in a home after a divorce or death in a family. Everyone is left in a gigantic power struggle, which retires parents prematurely. Stepparents and stepchildren feel that they must protect their territory, ego, and family with secrets, isolation, intimidation, manipulation, and stonewalling behavior. When stepfamilies are choking, parents, stepparents, and stepchildren do not have to be severely depressed, take multiple medications for depression and energy, get a divorce, or attempt suicide for relief. Biological parents and stepparents do not have to be retired prematurely. There are better ways to keep everyone functioning in blended families. My book will not take away all the opposition you experience in blended families. We learn by overcoming opposition, not creating opposition. This book helps you analyze and carry the opposition to your efforts for your blended family.

"Sexual Abuse - Child Sexual Abuse True Stories (What You Need to Know & Shocking Child Abuse Statistics!)" is more than just a book of child abuse stories. The victims of child sexual abuse are 1 out of 4 girls and 1 out of 7 boys (World Health Organization). A majority of the offenders are people they know and trust like their family members. Each child has his/her own childhood sexual abuse story and it's a horror that each one have had to live through. There are 7 brief child abuse stories in this book that allows you to take a peek into their world to see what the child experienced, as well as food for thought about that particular experience. In an effort to increase awareness and keep the frequency of sexual abuse and child molestation to a minimum, this book also includes advice from experts and practical tips - some of which might have never crossed your mind, as well as a look into the plight of survivors. The child sexual abuse statistics alone are heartbreaking and unbelievable; things that are hard to fathom, and so many. You'll also find out why mothers who know about it many times do nothing about it and what that does to the child on into adulthood. If you've wondered what child sexual abuse is about - not only the stories - but its prevalence (statistics), psychological and emotional impact, things that can be done to help prevent it, and available resources on a worldwide basis including current phone numbers, support groups and websites, all of that information is contained in this book. Collectively with just a little awareness about that dark world, I feel we can make a difference in protecting the innocence of children/adolescence/teens from molestation and sexual abuse.
